SUMMARY

I'm a, primarily self-taught, web developer with a special place in his heart for Ruby. I also get excited about learning, and people that believe in continuous education and improvement. In particular, I love writing better code with *Extreme Programming* techniques.

EXPERIENCE

Development Intern, Rally Software
Boulder, Colorado — April 2013 - present

When I started at Rally, I paired with and learned from the more experienced developers. After a few months, I joined a team of other interns to explore a new market and build a product for it.

Accomplishments

- Contributor to project management tool, waffle.io
- Grew user base to 15,000 views/month
- Wrote popular blog posts about our process

IT Intern, CH2M-Washington Group
Idaho Falls, Idaho — Summer 2012

As an IT intern, I got the chance to wear many hats and occupy many roles. I helped with hardware problems and also wrote software.

Accomplishments

- Helped fix many IT problems
- Wrote self-help web pages
- reduced reliance of the employees on the IT hardware team.

EDUCATION

Colorado State University, CO —
B.S. Mathematics, 2014
3.4 Grade Point Average

SKILLS

My core competency is in the Ruby programming language. However, I am proficient in the following tools/technologies: Rails, Javascript, Coffeescript, Node.js, Backbone.js, HTML, CSS, Git, Github

In addition, I'm familiar with many agile practices and extreme programming techniques, such as TDD, pairing, scrum, and kanban
